LIST OF REVISIONS

1. Revision List

A. This Illustrated Parts Catalog includes the original issue and the following listed revisions. To ensure that information in this manual is current, the revisions must be incorporated in the manual as they are issued.

Original Issue - August 1967

Revision Number	Date	Revision Number	Date
1	January 1969	4	3 July 2006
2	June 1982		
3	5 July 2004

INTRODUCTION

1. Purpose

A. The purpose of this Illustrated Parts Catalog is to illustrate and identify replacement parts and assemblies necessary for the support of the model covered herein. The information in the catalog is based on data available at the time of publication. DO NOT USE this Illustrated Parts Catalog to determine removal and installation procedures, refer to the Maintenance Manual.

B. This Illustrated Parts Catalog is divided into chapters which correspond to equivalent chapters in the Maintenance Manual and is prepared in accordance with Air Transport Association Specification Number 2200.

C. The information in this publication is based on data available at the time of publication and is updated, supplemented, and automatically amended by Service Letters, Service Bulletins, Publication Revisions, Reissues, and Temporary Revisions which are issued through subscriptions service available from Cessna Product Support. All such amendments become part of and are specifically incorporated within this publication. Users are urged to keep abreast of the latest amendments to this publication through Cessna Product Support subscription services and/or Cessna Authorized Service Stations.

WARNING: ALL INSPECTION INTERVALS, REPLACEMENT TIME LIMITS, OVERHAUL TIME LIMITS, THE METHOD OF INSPECTION, LIFE LIMITS, CYCLE LIMITS, ETC., RECOMMENDED BY CESSNA ARE SOLELY BASED ON THE USE OF NEW, REMANUFACTURED, OR OVERHAULED CESSNA APPROVED PARTS. IF PARTS ARE DESIGNED, MANUFACTURED, REMANUFACTURED, OVERHAULED, AND/OR APPROVED BY ENTITIES OTHER THAN CESSNA, THEN THE DATA IN CESSNA'S MAINTENANCE/ SERVICE MANUALS AND PARTS CATALOGS ARE NO LONGER APPLICABLE AND THE PURCHASER IS WARNED NOT TO RELY ON SUCH DATA FOR NON-CESSNA PARTS. ALL INSPECTION INTERVALS, REPLACEMENT TIME LIMITS, OVERHAUL TIME LIMITS, THE METHOD OF INSPECTION, LIFE LIMITS, CYCLE LIMITS, ETC., FOR SUCH NON-CESSNA PARTS MUST BE OBTAINED FROM THE MANUFACTURER AND/OR SELLER OF SUCH NON-CESSNA PARTS.

D. Inspection, maintenance and parts requirements for STC installations are not included in this manual. When an STC installation is incorporated on the airplane, those portions of the airplane affected by the installation must be inspected in accordance with the inspection program published by the owner of the STC. Since STC installations may change systems interface, operating characteristics and component loads or stresses on adjacent structures, Cessna provided inspection criteria may not be valid for airplanes with STC installations.

2. Effectivity

A. Airplane effectivity is indicated in the detailed parts list by a ten-character alpha numeric code. The first five characters indicate the first applicability and the last five characters indicate the last applicability on an unbroken sequence of assigned airplanes. The first character of each applicable block is reserved for Alpha model designator. If this column is blank opposite a first column listing of the figure, the usage is applicable to all models and serials covered by this catalog. If this column is blank opposite any indented listing, the usage is applicable to all models and serials covered by the next higher assembly or assemblies under which it appears.

NOTE: Information in this Illustrated Parts Catalog is applicable to U.S. and Foreign Certified airplanes. Information unique to a particular country is identified in the chapter(s) affected.

© Cessna Aircraft Company

3. Aerofiche

A. The Illustrated Parts Catalog has been designed for Aerofiche presentation. To facilitate the use of the catalog for Aerofiche, fiche/frame numbers have been added to the Alphabetical and Alpha/Numeric Indexes. Refer to the header of the applicable fiche for location of various indexing information.

4. Compact Disc (CD-ROM)

A. Publications for this model are available in paper and as electronic media CD-ROM (Compact Disc - Read Only Memory). The paper publications are available as individual publications, such as Maintenance Manual, Parts Catalog, etc, while the electronic service publications are grouped together on the CD. One CD includes all the service publications (Maintenance Manual, Illustrated Parts Catalog, Wiring Diagram Manual, Component Maintenance Manual, Nondestructive Testing Manual, Structural Repair Manual, and Illustrated Tools and Equipment List and all the Service Letters and Service Bulletins. These publications are kept up to date through routine revisions.

5. Alpha/Numeric Index (Paper Version of this Manual Only)

A. Part numbers in the Alpha/Numeric index are arranged in order according to the extreme left digit, then the next digit to the right, etc. The digits are used in the following sequence: space, decimal, slash (/), symbols (such as #), letters of the alphabet, then numbers in numerical order.

B. The Alpha/Numeric Index is a complete listing of all parts included in the Detailed Parts List.

6. Nomenclature Column

A. General System of Assembly Order. The indention system used in the nomenclature column of this catalog shows the relationship of one part to another. For a given item, the indention code shows a system, installation or general heading starting in the extreme left position continuing on down into succeeding columns until the end detail is reached (refer to Figure 1).

B. The relationship of the items listed is shown by the degree of indention of each item. For example: the battery installation is listed in the first indenture of the nomenclature column. The Battery Assy-Manifold is the next lower assembly and is therefore listed in the second indenture of nomenclature column. Refer to paragraph A, General System of Assembly Order.

C. If two or more assemblies contain a majority of identical parts or if the assemblies are left or right, the assemblies are listed together and the next lower assemblies or detail parts are listed as common for both assemblies with the differing parts coded for usage on the correct assembly.

D. Attaching parts are listed immediately beneath the item to be attached and preceding any detail parts of the item. They are listed in the same indention as the item they attach and are preceded by the caption “Attaching Parts”. The end of the attaching parts listing is followed by a separating symbol ---*---. Component parts which are not included in any assembly, but are used in conjunction with, or attach to certain assemblies, are listed either preceding the first detail or following the last detail of the assembly or installation and in the same indenture as the major assembly or installation.

7. List of Effective Pages (Paper Version of this Manual Only)

A. A List of Effective Pages is provided in the front of each chapter of the catalog. All pages in the catalog are listed in sequence on the List of Effective Pages with the most recent revision date for each page. A revised List of Effective Pages is provided for every Illustrated Parts Catalog revision.

8. Revision Filing Instructions (Paper Version of this Manual Only)

A. Regular Revision.
(1) Refer to the List of Effective pages of each chapter while inserting a revision.
(2) Pages changed by the revision will be indicated by the revision date on the page and on the List of Effective pages for that chapter. The revised page replaces the existing page in the manual.
(3) New pages added to the manual are indicated by “Added” on the List of Effective pages. Pages are inserted in the manual by chapter section subject and page number.
(4) Existing pages no longer needed in the manual are indicated by “Deleted” on the List of Effective pages. These pages are to be removed and discarded. When a page has been deleted by a revision, the List of Effective pages for subsequent revisions does not list the page.

B. Temporary Revisions:

(Paper version of this manual only.)
(1) File temporary revisions in the applicable chapter in accordance with filing instructions that appear on the title page.
(2) Temporary revisions should be removed from the manual only when replaced by a revision to the manual or by instructions noted on the superseding temporary revision.

9. Revision Indicators

A. Additions, deletions or revisions to the parts list will be identified by the letter “R” in the right margin of the page adjacent to the change, or addition. When technical changes cause unchanged text to appear on a different page/pages, an “R” will be placed in the margin opposite of the affected items.

10. Cessna Part Numbering System

A. The basic number identifies the Cessna drawing only. Each Installation, Assembly or Detailed Part is assigned a part number which consists of a seven digit drawing number and an appropriate dash number (refer to Figure 2).

© Cessna Aircraft Company

B1516

Part Number System
Figure 2

11. Standard Parts

A. Many parts having standard usage have been incorporated into the Cessna Standard System. Parts in this group are designated with the part number prefix "S", "CM" or "C".

B. For standard hardware items such as screws, nuts, clamps, etc., AN, NAS, and MS standard numbers are listed.

12. Page Numbering System

A. The Page Numbering System used in the Illustrated Parts Catalog consists of three-element numbers separated by a dash with the figure number, page number and date printed to the side (refer to Figure 3).

B1518

Page Numbering System
Figure 3

13. Part Number Column

A. This column contains the manufacturer's part number used to identify the item.

14. Units per Assembly Column

A. The quantity listed in the Units Per Assembly column is the quantity used per item. The quantity listed for attaching parts denotes the quantity necessary to attach only one item. The total quantity necessary to attach more than one item may be obtained by multiplying the quantity of attaching parts by the number of items to be attached.

15. Symbols and Part Number Terms

A. A blank entry in the part number column appears before an unprocurable part or installation which is also denoted in the “Units per Assembly” column by the use of the symbol RF (Reference).

© Cessna Aircraft Company

B. Reference - When the term, “REFER TO --”, appears in the Nomenclature Column and the units per assembly column indicates “RF”, the figure referred to will be the next highest assembly of the referred item. If the units per assembly column shows a quantity, the figure referred to will be the breakdown.

C. Deleted - Not Used - When the term, “DELETED NOT USED”, appears in the description column, it signifies that the index number was used but is no longer required. This procedure is used to eliminate reindexing of all items following the deleted part.

D. Bulk Item - When the letters BKI appear in the Nomenclature Column and the units per assembly column indicates “AR” (As Required). Refer to Cessna Service Parts Center for prices and units of measure.

16. Abbreviations Commonly Used

&	and	AC	alternating current
ADF	automatic direction finder	ADI	attitude director indicator
ALT	alternate	ALT	alternating current
AOA	angle of attack	APU	auxiliary power unit
AR	as required	ASI	airspeed Indicator
ASSY	assembly	BKI	bulk item
BL	butt line	CDU	control display unit
CVR	cockpit voice recorder	CWS	center wing station
DC	direct current	DF	directional gyro
DME	distance measuring equipment	ECU	electronic control unit
EFIS	electronic flight indicating system	EGT	exhaust gas temperature
EHSI	electronic horizontal situation indicator	EL	electroluminesent
FIG	figure	FM	frequency modulation
FMS	flight management system	FSO	for spares order
FS	fuselage station	FT	foot
FWD	forward	GPS	global positioning system
GPU	ground power unit	HF	high frequency
HSI	horizontal situation indicator	IAS	indicated airspeed
INBD	inboard	INSTL	installation
IPC	illustrated parts catalog	ITT	inter turbine temperature
J-BOX	junction box	KIAS	knots indicated airspeed
LBL	left butt line	LCD	liquid crystal display
LED	light emitting diode	LH	left
LNAV	lateral navigation system	LWR	lower
MFD	multi-function display	MLG	main landing gear
NLG	nose landing gear	NP	not procurable
OAT	outside air temperature	OBS	omni bearing selector
OUTBD	outboard	PCU	power control unit

PSI	pounds square inch	PTU	power transfer unit
P/N	part number	PRESS	pressure
R NAV	area navigation	RAM	random access memory
RAT	ram air temperature	RBL	right butt line
RF	radio frequency	RF	reference
RH	right	RMI	radio magnetic indicator
RPM	revolutions per minute	SAT	static air temperature
SB	service bulletin	SS	stabilizer station
TACAN	tactical air navigation system	TAS	true airspeed
TB	terminal block	TCAS	traffic collision avoidance system
TEMP	temperature	TR	temporary revision
UHF	ultra high frequency	UPR	upper
USART	universal synchronous/asynchronous receiver/transmitter	V NAV	vertical navigation
VASI	visual approach slope indicator	VG	vertical gyro
VHF	very high frequency	VLF	very low frequency
VOR	very high frequency omnidirectional and radio range	VSI	vertical speed indicator
WBA	wire bundle assembly	WBSA	wire bundle subassembly
WL	water line	WS	wing station

17. Serial and Color

A. When ordering upholstery material, carpet or interior trim, include airplane model and serial number. Model and serial number is important to assure that correct color combination is received.

B. When color of upholstery material, carpet or interior trim parts are ordered, include the airplane serial number.

18. Definition of Text Page Information

A. Refer to Figure 4.

NOTE: Sample pages are to be used for instructional purposes only! These pages are not intended to represent any part of actual airplane covered by this or any other publication.

(1) The figure number refers to the corresponding illustration.
(2) The number in the Figure and Item Number column corresponds to the item number on the part in the corresponding illustration.
(3) Parts with the item number preceded by a dash are not indexed on the illustration.
(4) A number in the Units per Assembly column indicates the quantity of the part used per next higher assembly or installation.
(5) Numbers in the Effectivity column indicate usage of the part is restricted. For example, the numbers 0001 0023 indicate that the part is used on airplanes 1 through 23.
(6) This cross-reference indicates the figure in which the installation of assembly is broken down to its component parts.
(7) Parts used in the quantity “as required” are indicated by “AR” in the Units per Assembly column.
(8) Alternate part numbers are listed immediately following the part for which they may be substituted. The entry “ALT FOR ----” will be in the Nomenclature column.

© Cessna Aircraft Company

(9) RF" indicates the installation or assembly is listed again in the figure cross-reference in the Nomenclature column. The Units per Assembly is given in the referenced figure.
(10) Parts used only on a left or right installation or assembly are designated by "LH" or "RH" in the Nomenclature column.
(11) "A "USED ON"" or "USED WITH" note in the nomenclature column indicates the proper next higher assembly of a part when the part is not common to all of the next higher assemblies listed preceding the part.
(12) The letter "R" in the right margin indicates text added or revised by the latest catalog revision.

19. How to Use Catalog If Part Number Is Known

A. Refer to Figure 5.
   (1) Find the part number in the Part Number Index.
   (2) Refer to chapter, section, subject, figure and item number.
   (3) Turn to chapter, section, subject and figure.
   (4) Locate part on illustration and in part number column by item number.

20. How To Use Catalog If Part Number Is Unknown

A. Refer to Figure 6.
   (1) Turn to Alphabetical Index.
   (2) Refer to main group in which part should be listed.
   (3) Find the chapter, section, subject and figure number in which the part should be shown.
   (4) Turn to the illustration and find the part.
   (5) Refer to corresponding item number in the part number column.

OPTIONAL EQUIPMENT AND ACCESSORY KITS

Accessory Kit No.	Description	Serial Effectivity
AK310-59	Aft Single Seat	35772 thru 39031
AK310-86	Aft Single Seat	39032 & On
AK310-33	Auxiliary Fuel Tank System (30 U.S. gals)	35000 thru 35546
AK310-49	Auxiliary Fuel Tank System (30 U.S. gals)	35547 & On
AK310-67	Cabin Air Vent	35772 thru 35937
AK310-20	Cargo Tie-Down Lugs	35000 & On
AK310-60	Center Single Seat - LH	35772 thru 39031
AK310-76	Center Single Seat - LH	39032 & On
AK310-68	Center Single Seat - RH	35772 thru 39031
AK310-75	Center Single Seat - RH	38032 & On
AK310-74	Conversion Kit - Lounge to Center Single Seat	35772 thru 39031
AK310-77	Conversion Kit - Lounge to Center Single Seat	39032 & On
AK310-22	De-ice Light	35000 & On
AK310-72	De-ice System (for old factory partial)	35000 thru 35905
AK310-73	De-ice System (for new factory partial)	35906 & On
AK310-62	Dividing Curtain	35772 & On
AK310-24	Dual Control Wheel and Pedals	35000 thru 35546
AK310-66	Dual Control Wheel and Pedals	35547 thru 35771
AK310-63	Dual Control Wheel and Pedals	35772 & On
AK310-82	Fire Extinguisher (hand type)	35000 & On
AK310-1	Flares Installation	35000 thru 35546
AK310-43	Flares Installation	35547 & On
AK310-25	Generator & Voltage Regulator - 50 amp (Bendix)	35000 thru 35184
AK310-30	Generator & Voltage Regulator - 50 amp (Bendix)	35185 thru 35771
AK310-69	Generator & Voltage Regulator - 50 amp (Bendix)	35772 thru 39008
AK310-88	Generator & Voltage Regulator - 50 amp (Bendix)	39009 & On
AK310-94	Generator & Voltage Regulator - 50 amp (Delco Remy)	35263 & On

Accessory Kit No.	Description	Serial Effectivity
AK310-6	Ground Service Plug	35000 & On
AK310-54	Headrest	35772 thru 39031
AK310-84	Headrest	39032 & On
AK310-19	Hoisting Provisions	35000 & On
AK310-58	Lounge Installation	35772 thru 39031
AK310-85	Lounge Installation	39032 & On
AK310-53	Non-Congealing Oil Cooler	35000 thru 39031 except airplanes incorporating O-470-B engines.
AK310-8	Oil Dilution System	35000 thru 35771
AK310-64	Oil Dilution System	35772 & On
AK310-37	Oxygen System - 5 Port	35000 thru 35546
AK310-39	Oxygen System - 5 Port	35547 thru 35771
AK310-65	Oxygen System - 5 Port	35772 & On
AK310-80	Oxygen System (fwd mtd)	39032 & On
AK310-44	Propeller Anti-Ice System	35000 & On
AK310-29	Propeller Feed Shoe (anti-ice)	35000& On
AK310-45	Reclining Rear Seat	35547 thru 35847
AK310-89	Reclining Rear Seat	35848 & On
AK310-5	Right Landing Light	35000 thru 35546
AK310-47	Right Landing Light	35547 thru 35771
AK310-56	Right Landing Light	35772 & On
AK310-50	Rotating Beacon	35000 thru 35546
AK310-52	Rotating Beacon - Fin Mtd	35547 thru 35771
AK310-57	Rotating Beacon - Fin Mtd	35772 thru 39031
AK310-78	Rotating Beacon Installation	39032 & On
AK310-21	Safe Flight Speed Control System	35000 thru 35546
AK310-48	Safe Flight Speed Control System	35547 & On
AK310-15	Shoulder Harness	35000 & On
AK310-27	Shoulder Harness	35226 & On
AK310-110	Static Dischargers	35000 & On
AK310-26	Stretcher Installation	35000 & On
AK310-4	Taxi Light	35000 thru 35546
AK310-46	Taxi Light	35547 thru 35771
AK310-70	Taxi Light	35772 & On
AK310-28	Winterization (cowl opening & oil cooler)	35000 thru 39031

RADIO SECTION

1. GENERAL

A. The following section contains information on all the electronic equipment installations that have been offered on the 310, 310B, 310C, 310D, with the exception of that equipment used on the 310 serials 35000 thru 35096.

B. The combination charts on the following figures show the various combinations, identified by the sales group number. To read the following charts, locate the desired sales group number in the left hand column, reading to the right, markers will be found in the vertical columns. These indicate that the installations noted are required in the combination. By following up the respective vertical column to the heading, the names of the installations and the figures on which they are illustrated may be found.

2. RADIO CHARTS

A. Use the following radio charts to determine the correct domestic or export radio combinations. Refer to Figure 1, Figure 2, Figure 3, Figure 4, Figure 5, Figure 6, Figure 7, and Figure 8.

Service Bulletin List

1. List of Incorporation

A. The following Service Bulletins and Service Kits have been incorporated into this manual.

Service Bulletin Number	Title	Service Bulletin Date	Service Kit Number	Manual Incorporation
MEB00-9	Engine Breather Line Modification/ Breather Vent Tube Installation	December 26/2000		July 3/2006
MEB00-9 Rev 1	Engine Breather Line Modification/ Breather Vent Tube Installation	May 6/2002		July 3/2006
MEB00-9 Rev 2	Engine Breather Line Modification/ Breather Vent Tube Installation	November 4/2002		July 3/2006
MEB05-5	Lower Front Wing Spar Cap Inspection/Modiciation	June 27/2005	SK310-115	July 3/2006
MEB86-15	Special 'Seat Locked' and 'Fuel Contamination' Warning Placards	July 11/1986		July 3/2006
MEB88-3	Auxiliary Fuel Pump Wiring Modification	August 12/1988	SK310-104	July 3/2006
MEB88-3 Rev 1	Auxiliary Fuel Pump Wiring Modification	March 3/1989	SK310-104B	July 3/2006
MEB88-3 Rev 2	Auxiliary Fuel Pump Wiring Modification	January 18/1991	SK310-104B	July 3/2006
MEB93-11	Pitot Heater and Single Engine Operation Warning Placards	December 17/1993		July 3/2006
MEB93-11 Rev 1	Pitot Heater and Single Engine Operation Warning Placards	December 16/1994		July 3/2006
MEB96-04	Seat Belt and Shoulder Harness Connection Inspection	March 29/1995		July 3/2006
MEB96-11	Seat Belt and Shoulder Harness Installation	October 18/1996	SK310-105	July 3/2006
MEB97-04	Flight in Known Icing is Prohibited Placard Installation	March 24/1997		July 3/2006
MEB00-1	Teledyne Continental Engine Crankshaft Manual Inspection	May 15/2000		NO EFFECT
MEB00-1 Rev 1	Teledyne Continental Engine Crankshaft Manual Inspection	December 26/2000		NO EFFECT
MEB00-5	Vacuum System Manifold Check Valve Inspection/Replacement	October 2/2000		NO EFFECT
MEB01-4	Teledyne Continental Engine Driven Fuel Pump Inspection and Seal Leak Test	July 2/2001		NO EFFECT
MEB02-1	Engine Failure During Flight Emergency Procedures	January 28/2002		NO EFFECT

NOTE 1—THIS ASSEMBLY INCORPORATES A MODIFICATION TO THE LANDING GEAR DOOR MECHANISM SUPPORT STRUCTURE. AIRPLANES SERIALS 35791 THRU 35833 HAVE BEEN MODIFIED AT FACTORY.

NOTE 2—WHEN ORDERING EITHER OF THESE WING STRUCTURE ASSEMBLIES FOR AIRPLANES SERIAL35772 THRU 35833, ALSO ORDER AN6-33A BOLT, AN509-616R58 SCREW, AN960-616L WASHER, 10310-021-2 BEARING, 5045001-201 LH ARM ASSEMBLY, 5045001-202 RH ARM ASSEMBLYAN960-816L WASHER, 0843502-1 SPACER, 0826000-39 LH DOOR ASSEMBLY AND 0826000-40 RH DOOR ASSEMBLY. THIS ASSEMBLY IS EQUIPPED WITH 1/2" DIAMETER DE-ICE LINES, LOCATED BEHIND THE FIREWALL. WHEN ORDERING THIS ASSEMBLY FOR AIRPLANES SERIAL 35906 & ON EQUIPPED WITH THE GOODRICH STORED ENERGY TYPE DE-ICE SYSTEM (3/8" LINES) ALSO ORDER (2) TWO 0820526-1 UNION, (2) S-51-8 HOSE 2 INCHES LONG AND (4) NAS397-12 CLAMPS.

NOTE 3—WHEN ORDERING THIS ASSEMBLY FOR AIRPLANES PRIOR TO SERIAL 35729, ALSO ORDER 0850469-1 RELAY, AN515-8R8 SCREW, AN960-10 WASHER AND 0850484-1 BUS BAR ASSY.

NOTE 1—THIS ASSEMBLY INCORPORATES A MODIFICATION TO THE LANDING GEAR DOOR MECHANISM SUPPORT STRUCTURE. AIRPLANES SERIALS 35791 THRU 35833 HAVE BEEN MODIFIED AT THE FACTORY.

NOTE 2—WHEN ORDERING 0892003-9 FOR APPLICABLE SERIALS OR 0892003-7 PRIOR TO SERIAL 35729, ALSO ORDER 0850469-1 RELAY, AN515-8R8 SCREW, AN960-10 WASHER AND 0850484-1 BUS BAR ASSEMBLY.

NOTE 3—WHEN ORDERING THIS ASSEMBLY FOR AIRPLANES SERIAL 35772 THRU 35833, ALSO ORDER AN6-33A BOLT 4 EACH, AN509-616R58 SCREW 2 EACH, AN960-616L WASHER 2 EACH, 10310-021-2 BEARING 2 EACH, 5045001-201 ARM ASSEMBLY, 5045001-202 ARM ASSEMBLY, AN960-816L WASHER 2 EACH, 0843502-1 SPACER 2 EACH 0826000-39 DOOR ASSEMBLY, 0826000-40 DOOR ASSEMBLY. THIS ASSEMBLY IS EQUIPPED WITH 1/2" DIAMETER DE-ICE LINES, LOCATED BEHIND THE FIREWALL. WHEN ORDERING THIS ASSEMBLY FOR AIRPLANES SERIAL 35906 & ON EQUIPPED WITH THE GOODRICH STORED ENERGY TYPE DE-ICE SYSTEM (3/8" LINES), ALSO ORDER (2) TWO 0820526-1 UNION, (2) TWO S-51-8 HOSE 2 INCHES LONG & (4) FOUR NAS397-12 CLAMPS

NOTE 1—THIS ENGINE BAFFLE INSTALLATION APPLIES TO ALL 0-470-M, 0-470-M CUST SPEC. 5 & I0-470-D (CUST SPEC. 1) ENGINES. THE 0-470-B ENGINE IS NO LONGER AVAILABLE, FOR REPLACEMENT ORDER 0-470-M (CUST SPEC.5) ENGINE. WHEN AN 0-470-M (CUST SPEC.5) ENGINE IS ORDERED TO REPLACE AN 0-470-B, ALSO ORDER 0851754-1 BAFFLE ASSEMBLY, 0851746-1 BAFFLE ASSEMBLY, 0750135-1 BAFFLE ASSEMBLY, 0750135-3 FORWARD BAFFLE, 0750135-8 BAFFLE ASSEMBLY, AN3-70A BOLT, AN3-60A BOLT, 0851748-1 BAFFLE ASSEMBLY AND 0851753-1 BAFFLE ASSEMBLY.

NOTE 2—WHEN ORDERING THIS PART FOR AIRCRAFT NOT INCORPORATING A LOCKING DEVICE FOR ENGINE MOUNT BOLTS ALSO ORDER AN7-32A BOLT AND 0851559-1 LOCKWASHER.

NOTE 3—THE 0-470-M ENGINE IS AVAILABLE IN THE FOLLOWING QUICK CHANGE KITS. 0895001-5 (WITH 25 AMP GENERATOR). 0895001-6 (WITH 25 AMP GENERATOR, ANTI-ICE & DE-ICE EQUIPMENT. 0895001-7 (WITH 50 AMP GENERATOR). 0895001-8 (WITH 50 AMP GENERATOR, ANTI-ICE AND DE-ICE EQUIPMENT).

NOTE 4—THE I0-470-D (CUST SPEC. 1) ENGINE IS AVAILABLE IN THE FOLLOWING QUICK CHANGE KITS. 0895005-1 (WITH 25 AMP GENERATOR) (SERIAL 35772 THRU 39031). 0895005-2 (WITH 50 AMP GENERATOR) (SERIAL 35772 THRU 39031). 0895005-3 (WITH 25 AMP GENERATOR) (SERIAL 39032 & ON). 0895005-4 (WITH 50 AMP GENERATOR)(SERIAL 39032 & ON)
